

## Business Account Setup Guide

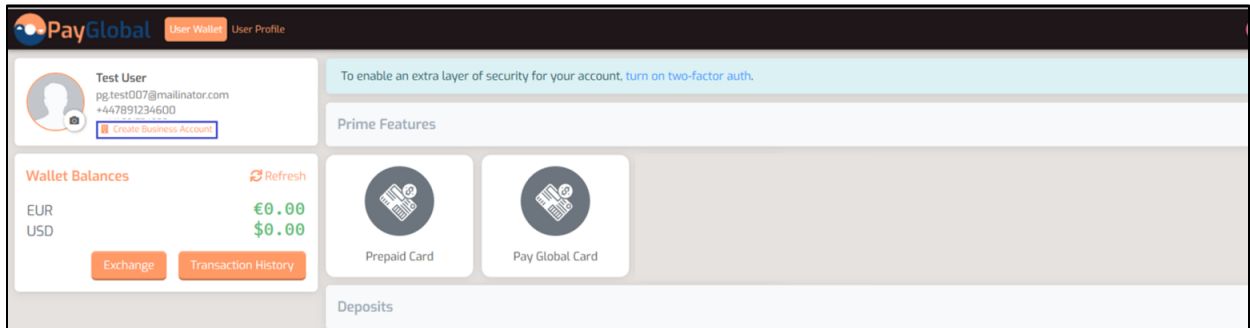

*Note: To create business account, an individual account has to be created first. Please refer “Create Individual Account” user guide for that. The email and phone number for business account should be different from individual account. And, the business account will be accessed through individual account credentials. Business Account will not have any separate authentication.*

## Create Business Account

1. Login to your PayGlobal individual account.

2. Click on the “Create Business Account” link.

3. Enter the required details, and click on the “Submit” button.

*Note: The email and phone number for business account should be different from individual account. Email verification is there for business account. However, no mobile verification is required for business account.*
